A scatter plot showing the relationship between the number of lectures (X-axis) and the number of subscribers (Y-axis) for the top 1000 channels. The X-axis ranges from 0 to 600, and the Y-axis ranges from 0K to 100K. The plot shows a dense cluster of points at low lecture counts (below 100) and low subscriber counts (below 20K). There are several outliers with high subscriber counts (above 50K) at low lecture counts (below 100). The density of points decreases as the number of lectures increases, with a few points at higher lecture counts (above 200) and higher subscriber counts (above 50K).

The chart displays the monthly subscription count over a 42-month period. The y-axis, 'Subscriptions', is scaled in millions, with 0.0M at the bottom and 0.5M at the top. The x-axis, 'Month of subscription', marks time with labels every six months (Jan, Jul) for each year from 2014 to 2017. The data is represented by a solid purple line. The subscription count starts at approximately 0.05M in Jan 2014, rises to a peak of about 0.25M in May 2014, then drops to 0.08M in Jun 2014. It continues to fluctuate, reaching another peak of 0.4M in Nov 2015, followed by a sharp decline to 0.15M in Jan 2016. The highest point is reached in Feb 2016 at approximately 0.48M. After a significant drop to 0.15M in Apr 2016, the count remains relatively stable around 0.2M until Sep 2016, then declines to 0.1M in Jan 2017, and finally drops to 0.0M by Jul 2017.

| Month of subscription | Subscriptions (M) |
|-----------------------|-------------------|
| Jan 2014              | 0.05              |
| Feb 2014              | 0.10              |
| Mar 2014              | 0.15              |
| Apr 2014              | 0.25              |
| May 2014              | 0.25              |
| Jun 2014              | 0.08              |
| Jul 2014              | 0.12              |
| Aug 2014              | 0.15              |
| Sep 2014              | 0.20              |
| Oct 2014              | 0.18              |
| Nov 2014              | 0.18              |
| Dec 2014              | 0.18              |
| Jan 2015              | 0.12              |
| Feb 2015              | 0.25              |
| Mar 2015              | 0.20              |
| Apr 2015              | 0.32              |
| May 2015              | 0.30              |
| Jun 2015              | 0.12              |
| Jul 2015              | 0.18              |
| Aug 2015              | 0.30              |
| Sep 2015              | 0.38              |
| Oct 2015              | 0.28              |
| Nov 2015              | 0.35              |
| Dec 2015              | 0.40              |
| Jan 2016              | 0.25              |
| Feb 2016              | 0.30              |
| Mar 2016              | 0.35              |
| Apr 2016              | 0.48              |
| May 2016              | 0.15              |
| Jun 2016              | 0.22              |
| Jul 2016              | 0.22              |
| Aug 2016              | 0.12              |
| Sep 2016              | 0.18              |
| Oct 2016              | 0.25              |
| Nov 2016              | 0.22              |
| Dec 2016              | 0.18              |
| Jan 2017              | 0.18              |
| Feb 2017              | 0.20              |
| Mar 2017              | 0.15              |
| Apr 2017              | 0.10              |
| May 2017              | 0.12              |
| Jun 2017              | 0.12              |
| Jul 2017              | 0.00              |

The chart displays the monthly subscription count for a service from January 2014 to July 2017. The y-axis, labeled 'Subscriptions', ranges from 0K to 50K. The x-axis, labeled 'Month of review', shows the progression of time with major ticks every six months. The subscription count starts at approximately 2,000 in Jan 2014, rises to about 10,000 by May 2014, and then fluctuates between 5,000 and 15,000 through 2015. A significant peak occurs in early 2016, reaching nearly 50,000 subscriptions. Following this peak, the count drops sharply to around 5,000 in mid-2016 and then shows a general downward trend, ending at approximately 1,000 subscriptions in Jul 2017.

| Month of review | Subscriptions (approx.) |
|-----------------|-------------------------|
| Jan 2014        | 2,000                   |
| Jul 2014        | 5,000                   |
| Jan 2015        | 10,000                  |
| Jul 2015        | 8,000                   |
| Jan 2016        | 15,000                  |
| Jul 2016        | 5,000                   |
| Jan 2017        | 10,000                  |
| Jul 2017        | 1,000                   |
